TOXICOLOGY

VOLUME CONTENTS

Volume 80 (1993)

Announcement from the Publisher v

The accumulation of pentamidine and the toxic effects of the drug, its selected analogues and metabolites on isolated alveolar cells **(Type 2 epithelial cell, accumulate the antibiotic used in AIDS-related opportunistic infections)**
by H.E. Jones, G.K. Blundell, R.R. Tidwell, J.E. Hall, S.J. Farr and R.J. Richards (Cardiff, UK; Chapel Hill, NC) 1–12

Stage-specific effects of cadmium on preimplantation embryo development and implantation in the mouse **(Pregnancy failure following exposure to Cd during preimplantation period may reflect a direct embryotoxic effect)**
by S.K. De, B.C. Paria, S.K. Dey and G.K. Andrews (Kansas City, KS) 13–25

Hepatic clotrimazole concentrations and hepatic drug metabolizing enzyme activities in adult male Sprague–Dawley rats **(A biphasic response is characterized)**
by J.B. Pappas and M.R. Franklin (Salt Lake City, UT) 27–35

The effects of ether anaesthesia on oxidative stress in rats — dose response **(CYP 2 E 1 increases while in general there is a decrease in cytochromes P-450 and glutathione)**
by P.T. Liu, P.A. Kentish and A.M. Symons and D.V. Parke (Beijing, People's Republic of China; Guildford, Surrey) 37–49

Cadmium disposition and metallothionein induction in mice: strain-, sex-, age- and dose-dependent differences **(Differences in hormonal or other intrinsic factors may influence the disposition of Cd)**
by Z.A. Shaikh, S.A. Jordan and P.C. Tewari (Kingston, RI) 51–70

Changes in free intracellular calcium and production of reactive oxygen metabolites in human leukocytes by soluble and particulate stimuli **(Both parameters increase after a chemotactic peptide, a phorbol ester, quartz or asbestos**
by M. Tuomala, M.-R. Hirvonen and K.M. Savolainen (Kuopio, Finland) 71–82

Corrigendum 83

Review article

Acute carbon monoxide poisoning in an animal model: the effects of altered glucose on morbidity and mortality **(A review of our current understanding of CO toxicology)**
by D.G. Penney (Detroit, MI) 85–101

Excretion of benzo[*a*]pyrene and metabolites in urine and feces of rats: influence of route of administration, sex and long-term ethanol treatment **(Excreted metabolites are below two percent of dose, ethanol has little effect except reduction of 3-OH-B[*a*]P excretion)**
by J.A.G. van de Wiel, P.H.S. Fijneman, C.M.P. Duijf, R.B.M. Anzion, J.L.G. Theuws and R.P. Bos (Nijmegen, The Netherlands) 103–115

Flow cytometric analysis of the effects of tri-*n*-butyltin chloride on cytosolic free calcium and thiol levels in isolated rainbow trout hepatocytes **(Cytosolic free calcium is elevated and thiol levels become depleted)**
by S. Reader, M. Marion and F. Denizeau (Québec, Canada) 117–129

Distribution of oleyl-anilide hydrolysing activity in rat and human tissues **(Activity is found mostly in adipose tissues and shows greater variability in humans)**
by A. Rodríguez-Martín, X. Remesar and M. Alemany (Barcelona, Spain) 131–139

Influence of hydration states on the acute nephrotoxic effect of gentamicin in the rat **(Both water load and dehydration increase excretion of urinary enzymes, soluble and particulate)**
by D.K. Obatomi and D.T. Plummer (London, UK) 141–152

Potentiation of 2,6-dinitrotoluene genotoxicity in Fischer-344 rats by pretreatment with Aroclor 1254 **(Aroclor stimulated hepatic and modified intestinal enzyme activities, accelerated biotransformation of DNT and potentiated adduct formation in the liver)**
by R.W. Chadwick, S.E. George, M.J. Kohan, R.W. Williams, J.C. Allison, Y.O. Hayes and J. Chang (Research Triangle Park and Chapel Hill, NC) 153–171

Carbon monoxide-induced cardiac hypertrophy is not reduced by alpha- or beta-blockade in the rat **(Enhanced preload may drive myocardial hypertrophy)**
by D.G. Penney and J.M. Formolo (Detroit, MI) 173–187

Toxicity of methyl linoleate ozonide in the rat **(Ozonides may play a role in ozone-induced pulmonary toxicity)**
by R.A. Hempenius, S.M.P. Dellevoet, G. Marsman, J.H. Koeman and J. de Vries (Wageningen and Heerlen, The Netherlands) 189–198

Reproductive toxicity evaluation of vanadium in male mice **(Only very high doses of more than 40 mg/kg per day affect fertility)**
by J.M. Llobet, M.T. Colomina, J.J. Sirvent, J.L. Domingo and J. Corbella (Reus and Barcelona, Spain) 199–206

Dose-response relationship between total cadmium intake and metallothioneinuria using logistic regression analysis **(It is estimated that about 2 g total Cd intake may represent the maximum allowable intake value)**
by T. Kido, Z.A. Shaikh, H. Kito, R. Honda and K. Nogawa (Kingston, RI; Chiba and Ishikawa, Japan) 207–215

Immunotoxic potencies of polychlorinated biphenyl (PCB), dibenzofuran (PCDF) and dibenzo-*p*-dioxin (PCDD) congeners in C57BL/6 and DBA/2 mice **(A rank order for immunotoxic potencies is given and was found to be similar for other Ah-receptor mediated responses)**
by N. Harper, K. Connor and S. Safe (College Station, TX) 217–227
